

Department of Pharmacology, GIMS

Why students should join MD Pharmacology at GIMS?

Following are the salient features of our department, which may help prospective postgraduate students to select this Institute for their MD course:

- 1. Experienced Faculty:**
 - We have highly qualified and experienced faculty members from prestigious colleges across India, who are experts in pharmacology, clinical research, and drug development.
 - They provide personalized mentorship and guidance to support academic and research pursuits.
- 2. State-of-the-Art Infrastructure:**
 - Modern classrooms equipped with the latest technology to facilitate interactive learning.
 - Dedicated research spaces for an enriching academic experience.
- 3. Well-Equipped Laboratories:**
 - Cutting-edge laboratories, including an experimental lab, computer-assisted lab, and clinical pharmacology lab, with advanced instruments.
 - Practical exposure to drug formulation, analysis, and testing techniques.
- 4. Animal Holding Area:** We also have an animal holding area for animal experimentation.
- 5. Advanced ADR Reporting Centre:**
 - A fully functional Adverse Drug Reaction (ADR) reporting centre that offers hands-on experience in pharmacovigilance.
- 6. Materiovigilance Program:**
 - Specialized training in materiovigilance to ensure the safe use of medical devices.
 - Opportunities to engage in national-level surveillance programs and research initiatives.
- 7. Excellent Placement Support:**
 - We provide placements in pharmaceutical companies.
 - Career guidance and soft skills training to enhance employability.
- 8. Industry Exposure:**
 - We offer industry visits, guest lectures, and workshops with leading pharmaceutical companies.
