

MD(Path) at GIMS Greater Noida

Scope of MD (Pathology)

Job opportunities as a Pathologist are varied and abound in terms of numbers and variety. As a Pathologist, one can aspire to work as a Pathologist in the Private sector hospitals or stand alone laboratories/ corporate labs. For those inclined towards academics, teaching opportunities are aplenty with a large number of existing medical colleges across all states and the government aiming to open more.

Job satisfaction as a Pathologist cannot be emphasized enough as sound diagnosis is the cornerstone of successful treatment. With predictive therapy and personalized medicine taking centrestage in the field of healthcare, the role of a Pathologist is paramount to shed the light on the treatment to be undertaken.

Why GIMS for MD Pathology?

GIMS is a rising star in Delhi- NCR in the field of Medical Education and has been awarded as a premier healthcare institute.

Dept of Pathology GIMS has all the facilities that budding Pathologists aspire for ie dedicated, well experienced faculty who have been trained in premier institutes of the country, very well stocked departmental library, museum, diagnostic services with state of the art equipments including Cryostat, Automated tissue processor, automated slide stainer, completely automated hematology lab etc.

The department has teaching microscopes with five and ten heads (Pentahead and Decahead respectively) which the faculty use to guide the student through the nuances of histopathology, cytopathology and immunohistochemistry.

The department is providing state of the art diagnostic services in Oncopathology with availability of a panel of more than thirty immunohistochemistry antibodies.

Research Opportunities

As a postgraduate, you will get a very good platform and opportunities for research, replete with abundant clinical material as well as a dedicated Research Wing to guide you through your dissertation and other cutting edge research.

The above is just a birds' eye view regarding MD Pathology at GIMS.
