

Why should students join MD Biochemistry at GIMS?

Pursuing a postgraduate degree in Biochemistry can offer a wide range of opportunities for academic, research, and professional growth. Here are some compelling reasons why students should consider joining MD Biochemistry at Government Institute of Medical Sciences (GIMS), Greater Noida:

1. Experienced Faculty

- Highly qualified and motivated faculty members trained from top institutes in India with advanced qualifications, including ACME, ensuring a robust academic foundation.
- Faculty members are actively involved in advanced research through the ICMR-Multidisciplinary Research Unit (MRU), providing students the opportunity to work on cutting-edge molecular biology topics for their thesis.

2. Patient Care

- The Clinical Biochemistry Lab at GIMS is a top-tier laboratory handling the majority of laboratory investigations essential for patient care, offering students hands-on experience in critical diagnostic practices.
- GIMS Biochemistry Lab is one of the few **NABL-accredited laboratories** in a government setup in North India. MD trainees gain expertise in running NABL-accredited labs, maintaining equipment precision, and generating accurate reports.
- Advanced equipment includes the **Vitros 5600 auto-analyzer** (USA-imported) for routine and special biochemical parameters, HPLC for HbA1c analysis, and exposure to Laboratory Information Systems (LIS).
- Graduates are equipped to confidently establish and manage accredited medical diagnostic labs post-MD.

3. Research Opportunities

- MD students gain strong research aptitude under the mentorship of highly motivated faculty with several PubMed-indexed publications.
- The state-of-the-art research wing includes cell culture facilities for conducting advanced studies and genome sequencing facilities for learning next-generation sequencing techniques.
- Various ongoing extramural and intramural research projects funded by **UP CST** provide students with opportunities to participate in meaningful, funded research, further enhancing their skills and experience.

4. Comprehensive Educator Training

- MD students will teach some of the best MBBS students, with GIMS being a top choice for NEET UG qualifiers in Uttar Pradesh. Teaching these motivated students enhances learning and teaching skills.
- Exposure to teaching nursing and paramedical students helps students become versatile educators in Biochemistry.
- Modern teaching methodologies, including live quizzes (Kahoot, Mentimeter), role plays, and interactive tools, are incorporated to ensure engaging and effective pedagogy.

5. Distinct Advantages of GIMS

- Among the few institutes in India offering MD Biochemistry, GIMS stands out for its emphasis on cutting-edge research, innovative teaching methods, and practical exposure to diagnostic labs.
